If you’re thinking about CBD (cannabidiol), you probably have some questions for your doctor.

It’s important to learn about CBD, and where it comes from, to get the safest and most effective results. Your doctor can be a good resource to help you learn more. Here are some questions to help you get the conversation going.

1. How is CBD different from THC (tetrahydrocannabinol)?
2. Is CBD right for me or my loved one?
3. How are FDA-approved CBD products different from those sold in dispensaries, online, or in stores?
4. Can CBD be added to my current medicines?
5. Are there any important considerations regarding safety?
